DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Baumann (US Patent # 6,104,922).

Regarding claim 1, Baumann teaches a method of identifying a signal type comprising the steps of: selecting a signal of interest from a displayed spectral waveform for a specified range of frequencies (column 5, lines 29-39); processing data representing the signal of interest to ascertain characteristics of the signal of interest (column 5, lines 35-45); and from the characteristics of the signal of interest determining an identification of the signal type (column 5, lines 54-65).

Regarding claim 2, Baumann teaches the determining step comprises the step of comparing the frequency of the signal of interest with a database of spectral assignments for a plurality of known signals to identify the signal type (column 5, lines 46-65).

Application/Control Number: 09/587,491

Art Unit: 2682

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Baumann (US Patent # 6,104,922).

Regarding claim 3, Baumann fails to specifically disclose the processing step comprises the step of estimating from the data an occupied bandwidth for the signal of interest as one of the characteristics for input to the determining step. However, since Baumann does disclose a processing step comprising estimating different characteristics for the signal of interest in order to have an input for the determining step (column 6, lines 58-66) and estimating an occupied bandwidth for a signal is very well known in the art, one of ordinary skill in the art at the time the invention was made would have looked to add bandwidth estimation to Baumann's invention in order to allow for more accurate measurements and better authentication means.

Allowable Subject Matter

Regarding claims 4-6; please see reasons for allowance in office action # 2, dated 10/3/02.

Response to Arguments

Applicant's arguments with respect to claims 4-6 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2682

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edan Orgad whose telephone number is 703-305-4223. The examiner can normally be reached on 8:00AM to 5:30PM with every other Friday off..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivian Chin can be reached on 703-308-6739. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9314 for regular communications and 703-872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.

Edan Orgad
